VOLUNTEER EXPERIENCE

Technical Director

Hillsong Phoenix Phoenix, AZ

I run the creative team during events, and troubleshoot software, computer, lighting, and audio systems when issues arise.

Director of Things

Just Be Love Project Phoenix, AZ

I built the website, and manage the server that the website is housed on. I provide other technical services as needed for administration and project events.

EDUCATION

Associate of the Arts

Film Production

Scottsdale School of Film & Theater

In my time at SSFT, I studied all aspects of film and television production, from scriptwriting and pre-production, to crew positions on set, and the post-production process.

PROFESSIONAL PROFILE

I began dabbling with server administration, and website design, in high school. Nine years ago, I began working more heavily in website technology fields. I started this journey simply answering customer support calls for web hosting services, and quickly discovered my love of website design by direct coding. As I progressed in my career, I began to focus on identifying and removing malware, and eventually took a position as a security analyst at SiteLock. In my time at SiteLock, I have grown a great deal in this area, and am ready to step up to new challenges.

CAREER EXPERIENCE

Senior Web Security Research Analyst

SiteLock Scottsdale, AZ

In my time at SiteLock, I began by identifying and removing malware from websites. I started building tools to streamline processes, and digging deeper into malware behavior and origins. This led me to to join, and eventually lead, the Research team, where I analyze malware, write clean signatures, and assist our Marketing department in communicating our findings to internal and external sources.

Hosting Support

Go Daddy Gilbert, AZ

I assisted customers with issues that may arise in their shared hosting accounts, as well as working the telephone, support ticket, and server support queues as needed. In my time as a Chat Support representative, I have used multiple chat applications to assist customers with everything from basic account maintenance, to creative problem solving as needed.

Server Administrator

Terra Del Sol Portland, OR

At Terra Del Sol, I maintained the server and client management system. I also managed the company website, and provided desktop support as needed.
